Step 1: Inviting Your Players

The first step of any good adventure is inviting your party! **Cabin #5 supports 6 players**, so make sure your player count fits within that range. We find it's best to invite as close to the maximum number as possible, as sometimes players drop out.

One of the easiest ways to invite your players is to create an RSVP form, either through Google Forms, SurveyMonkey, and other event apps. You can find an example form from us [here](#).

One of your main roles as host is to assign your players their characters for the game. There are a few ways to do this:

1. Assign characters at random using your player's preferred gender pronouns
2. Ask players to send you their top 3 character choices

We recommend you do not have your guests choose their own characters unless you have the max number of players, as people sometimes will not choose characters that are required to be played during the game. As host, you know which characters must be played and can assign accordingly. Don't worry too much about making sure people get their top choice, as all characters have exciting goals and backstories.

Remember to ask your guests for their Name, Email, and either their top 3 character choices or their gender pronouns.

Send your guests the following:

A survey form or email requesting:

- Name
- Email
- Their top 3 character choices
- Phone number (optional)
- The Cabin #5 Character List

Step 2: Assigning Characters

Now that your players have RSVP'd, it's time to assign characters! There are 6 characters in the game.
